Meet the iPad!
Magic & Revolutionary

In May we welcomed Joe Kukella of Macintosh Systems Solutions in Key West. Joe hosted our very first look at the "magical and revolutionary" iPad from Apple. The following article summarizes what so special about he newest innovation in the Apple line.

Emilie Stewart stood in line at the Apple Store for over an hour to buy this 64GB 3G model the day it was released.

Pete Bacheler enjoys showing Karen Sunderland Strobel what his iPad can do.

Shelley and Joe Miklas and their new baby, shown with a keyboard attachment.

One of the first things you-notice about iPad is how thin and light it is. The screen is 9.7 inches measured diagonally — slightly smaller than a magazine. It's just 1.5 pounds and 0.5 inch thick! And a slight curve to the back makes it easy to pick up and comfortable to hold.

LED-Backlit IPS Display

The high-resolution, LED-backlit displayis remarkably crisp and vivid, no matter what angle you are viewing from. It's not great in full sunlight, but sit in the shade and do your web browsing, reading, movie watching, email, or photo viewing. With iPad, there is no up or down. It's designed to show off your content in portrait or landscape orientation when you turn it. Youl get a brilliant picture, with excellent color and contrast.

Multi-Touch

The Multi-Touch screen on iPad is based on the same technology as the iPhone, but reengineered for the larger iPad surface, making it precise and responsive. So whether you're zooming in on a map, flicking through your photos, or deleting an email, iPad responds with incredible accuracy.

Up to 10 Hour Battery Life

To maximize battery life, Apple used the same lithium-polymer battery technology developed for Mac notebook computers and applied it to the iPad. You can use iPad for up to 10 hours while surfing the web on Wi-Fi, watching videos, or listening to music. Surfing the web on a 3G data network, you can get up to 9 hours of battery life. (Battery life varies with how gard the iPad is actually working. Just listening to music, it lasts even longer!)

Wireless or 3G Communication

iPad takes advantage of the fastest Wi-Fi networks with built-in 802.11n technology. It automatically locates available Wi-Fi networks, which you join with a few taps. iPad also comes with Bluetooth 2.1 + EDR, letting you connect to devices like wireless headphones or the Apple Wireless Keyboard.

iPad just became available in a 3G model with superfast data speeds up to 7.2 Mbps. So if you're traveling or you happen to be somewhere without a Wi-Fi network, you can still get a fast connection.

Thank you Joe, for hosting our "first look" at the iPad, and to all those who brought their new toys in for us to admire and try out!

OUR NEXT MEETING: Bring your PC friends, this one applies to everyone. Beginners: Come at 6:30 and bring your Mac and your questions. There will be some experienced users there to help for the half-hour before the formal presentation starts!

Thursday, June 10 at 7pm, KL Library Community Room:

Apple User Group · Upper Keys Mac User Group Meeting

PhotoShop WOW!

PC & Mac Users Welcome

Watch and learn as experts from all over the country (via video) show how to do things you've always dreamed of doing... and get inspired for your next Photoshop project.

Lighting effects, layer masks, text effects, grunge, motion blurs, isolations, posterizing and other cool effects will be demonstrated.

7PM Thursday **Jun.10**

Key Largo Library Community Room, MM 101.4 Oceanside Tradewinds Plaza

Hosted by the Upper Keys Mac User Group

Come at 6:30 for Help for Mac Beginners: Bring your laptop and your questions; for a half-hour prior to the main meeting we'll have experienced folks available to help!

Free and open to the public!

Performance/Under the Hood

The Apple A4 chip inside iPad was designed by Apple engineers to be extremely powerful yet extremely power efficient. The performance is unlike anything you've ever seen on a touch-based device. This makes iPad fantastic for everything from productivity apps to games.

Connectivity

The dock connector port (30-pin, like the iPhone and Touch) on the bottom of iPad allows you to dock and charge it. It also lets you connect to accessories like the iPad Camera Connection Kit and the iPad Keyboard Dock. You'll find many accessories designed to be compatible with the iPad.

Audio

The powerful built-in speaker produces rich, full sound perfect for watching a movie or listening to music. iPad also comes with a headphone jack and a built-in microphone. With 3G connectivity it can even be used as a giant iPhone!

Accessories

What makes iPad even better? Accessories. The iPad Keyboard Dock combines a dock with a full-size keyboard. You can import photos from a digital camera or SD card with the iPad Camera Connection Kit. The iPad Case not only protects your iPad, it lets you use it in various positions. And differ-

ent adapters let you connect iPad to TVs, projectors, and displays.

Apps for Your iPad

Over 150,000 apps are ready and waiting for you! If you already have apps for your iPhone or iPod touch, just sync them to iPad from your Mac or PC. They run in their original size or you can expand them to fill the iPad screen. And you can choose from over 150,000 iPhone and iPod touch apps in the App Store. iPad works with almost all of them.

Tap the App Store icon to download apps wherever you are. Browse a section of the store that features apps designed specifically for iPad. Tap the Genius icon to get recommendations for apps that you might like based on apps you and others have downloaded.

More to Come

The iPads we saw are just the beginning of what Apple has planned for us. While amazing just as it is, the iPad will get more capabilities and become even better as the product line unfolds. *MU*

iPads come in 3 sizes and with or without 3G capability.

Wi-Fi

16GB	32GB	64GB
$499.00	$599.00	$699.00

Wi-Fi + 3G 3G data plan sold separately.

16GB	32GB	64GB
$629.00	$729.00	$829.00

Stickies in Mac OS X Snow Leopard

submitted by Graham Thomas

Stickies is a special type of application window that remains on your Desktop as long as the Stickies application is running. You can use them for anything that a real-world sticky note can handle.

A sticky can contain data pasted from the Clipboard, you can type into in, and include graphics and different fonts and colors. You can even locate specific text from somewhere in your vast collection of Stickies by using the Find command within the application. Follow these steps to stick your way to success:

1. Open your Applications folder and run the Stickies application. The text cursor is already idling in the new window.

2. Type text in the window or press Command+V to paste the contents of the Clipboard into the window.

You can also import the contents of an existing file into a Sticky. Just click File and then choose Import Text to display a standard Open dialog.

3. Optionally, add text formatting, change text font, and change font color from the Font menu. From the Note menu, you can also choose to make the Sticky translucent. (Because they just look cool!)

4. Optionally, click the Color menu and choose the appropriate hue for your Sticky.

5. Resize and drag the Sticky window to the desired location.

Press Command+M to toggle between a miniaturized view (showing only the title bar) and the expanded view.

To automatically run the Stickies application each time you log on, open the Accounts settings in System Preferences and click your account in the list. Click the Login Items button and add Stickies to the list by clicking the plus button.

To delete a Sticky, simply click the Close button at the upper-left corner of the Sticky window. Or click the Sticky to make it the active note and then click Close. Stickies display a dialog to confirm that you want to close the note; click Save to save the contents in a file or click the Don't Save button to close the note and discard its contents.

To close the Stickies application completely, click any note and press Command+Q. *MU*

God and the iPad

from Bud Smith, WesPasMac User Group in New Port Richey, Florida

I thought you might enjoy this story written by my 90-year-old father who is a club member of WesPasMac User Group. He is an avid Apple supporter and loves his iMac, his iPad and owning Apple stock.

I PAD

I dreamed that I talked to God last night and this is how it went.

GOD. Sorry to interrupt your sleep but I think that we need to talk.

ME. Oh, Oh, What did I do now? and whatever it was, I"m sure that it was an accident.

GOD. Not to worry, I want to make a DEAL with you, but first let me tell you a little about how things are run up here. Saint Peter is in charge of all incoming residents and we need to be prepared for them as they arrive. Most of your generation is already here and you know we still have the boomers to worry about. We make a short list and when anyone hits 90 years of age, they are automatically on it. Now I don't mean to alarm you, but after all, you did fill out the Census Report for 2010 and you know exactly where you stand.

ME. Don't blame me for getting old, I'm just trying to follow in my parents footsteps as they both reached 90. They told me not to drink or smoke and I never have. WELL, except for that time when I was 11 years old and I smoked, out behind the barn. But You know all about that, of course.

GOD. Don't sweat the small stuff, let's get back to our DEAL. You were spotted in the crowd at the Apple Store, on Day ONE picking up a new IPAD. We hear that they are heavenly and a joy to use but unfortunately UPS doesn't deliver up here and Saint Peter is bugging me to get his hands on one. Of course I believe that it would be wonderful for all people to read MY BOOK on an IPAD. So, let's get back to our DEAL.

ME. O.K. What's the DEAL?

GOD. Saint Peter wants to know that if perchance you are selected, in the very near future. to make your way to the Pearly Gates, would you be so kind as to bring along your IPAD for him and he will make sure that you take a very basic ENTRANCE EXAM and receive his highest favorable recommendation. That's the DEAL. How about it?

ME. Just a minute there. Give up my IPAD for a place in Heaven? I'll have to think about that. What a tough decision. Well, O.K. I guess. What do I do now?

GOD That's the easy part. Just click on the Apple Store and then download, "Final Destination" Not to worry. It's a free APP. Thanks, now go back to sleep.

Reynolds L. Smith Sr. April 2010

A new PC virus alert.

by Gary Kampel, SEMUG

This morning I received an email with the Subject: "Thank you for buying iTunes Gift Certificate!" Attached was "Gift_Certificate_431.zip" (that turned into "Gift_Certificate_431.exe")

Come on guys. You know better than to open email like this, right?

Thankfully the .exe file is for PeeCee's. Remember that if your Mac has Windoze running on it this will getcha! They are phishing for your iTunes user name and password.

Hello! You have received an iTunes Gift Certificate in the amount of $50.00 You can find your certificate code in attachment below. Then you need to open iTunes. Once you verify your account, $50.00 will be credited to your account, so you can start buying music, games, video right away. iTunes Store. MU

Have you seen these guys lately?

---

2 Good Points from Ken Morley:

Fabulous meeting last night! I learned a gem: I am getting ready to upgrade my camera to five megapixels before our next trip. Now I only have to wait for the next iPhone, and it is wrapped in it. Up to now I couldn't justify buying an iPhone…

Last night there was a discussion of Adobe's Flash and why it is not on the iPad. On the Apple.com home page I discovered an article written by Steve Jobs himself titled "Thoughts on Flash." It spells out his reasoning quite clearly. The short answer is that it uses old technology that requires way too much power. Apple would be blamed for having a product with short battery life when the blame belongs solely to Adobe.

See you in November, and keep up the good work.

—Ken

Keyboard shortcuts are really useful, but sometimes hard to remember.
hank you Graham Thomas for this list we can reference!

Macintosh Keyboard Short Cuts

Key	Function
Command+A	Selects all items in the active window (icon view), all items in the column (column view), or all items in the list (cover flow view)
Command+C	Copies selected items
Command+D	Duplicates the selected item(s)
Command+E	Ejects the selected volume
Command+F	Displays the Find dialog
Command+H	Hides All Finder windows
Command+I	Shows info for selected item or items
Command+J	Shows the view options for the active window
Command+K	Displays the Connect to Server dialog
Command+L	Creates an alias for the selected item
Command+M	Minimizes the active window
Command+N	Opens a new Finder window
Command+O	Opens (or launches) the selected item
Command+R	Shows the original for selected alias
Command+T	Adds the selected item to the Sidebar
Command+V	Pastes items from the Clipboard
Command+W	Closes the active window
Command+X	Cuts the selected items
Command+Z	Undoes the last action (if possible)
Command+,	Displays Finder Preferences
Command+1	Shows the active window in icon mode
Command+2	Shows the active window in list mode
Command+3	Shows the active window in column mode
Command+4	Shows the active window in cover flow mode
Command+[	Moves back to the previous Finder location
Command+]	Moves forward to the next Finder location
Command+Del	Moves selected items to the Trash
Command+up-arrow	Show enclosing folder
Command+`	Cycles through windows
Command+?	Displays the Mac OS X Help Viewer
Command+Shift+A	Takes you to your Applications folder
Command+Shift+C	Takes you to the top-level Computer location
Command+Shift+G	Takes you to a folder that you specify
Command+Shift+H	Takes you to your Home folder
Command+Shift+I	Connects you to your iDisk
Command+Shift+Q	Logs you out
Command+Shift+N	Creates a new untitled folder in the active window
Command+Shift+U	Takes you to your Utilities folder
Command+Shift+Del	Deletes the contents of the Trash
Command+Option+H	Hides all windows except the Finder's window(s)
Command+Option+N	Creates a new Smart Folder
Command+Option+T	Hides the Finder window toolbar
Command+Option+Space	Opens the Spotlight window
Command+Space	Opens the Spotlight menu
F8	Choose another desktop using Spaces
F9 (or F3)	Shows all open windows using Exposé
F10 (or Control+F3)	Shows all open windows for the current application
F11 (or Command+F3)	Hides all windows to display the Desktop
F12 (or F4)	Displays your Dashboard widgets
Space	QuickLook

Donate Your "Stuff"

by Karen Beal

This is a cool new site to make giving and using 'stuff' easier. Michael Welber in Marathon came up with this. Feel free to send along to any groups that can use stuff or might donate stuff.

Apple Trivia Quiz

1. Apple Computers made the iMac in all of these colors except...
   - Strawberry
   - Tangerine
   - Persimmon
   - Grape
   - Lime

2. Who designed the computer that would become the Apple I?
   - Steven Jobs
   - Bill Gates
   - Steve Wozniak
   - Alan Kay
   - Vinton Cerf

3. According to legend, the first Apple computer was "born" on what significant date in 1976?
   - January 1st - New Year's Day
   - Jan. 26th - Super Bowl Sunday
   - April 1st - April Fools Day
   - April 15th - Income Tax Day
   - July 4th - Independence Day

4. Before co-founding Apple, Steven Jobs worked for what company?
   - Infocom
   - Atari
   - IBM
   - Wang
   - Hewlett-Packard

5. Before co-founding Apple, Steve Wozniak worked for what company?
   - AT&T
   - Microsoft
   - Xerox
   - Hewlett-Packard
   - ARCO

6. Which Apple computer was named after Steven Jobs' child?
   - Mac
   - Lisa
   - Pippin
   - Newton
   - Granny Smith

7. The Macintosh's revolutionary Graphic User Interface originated at what high-tech company?
   - IBM
   - Xerox
   - Texas Instruments
   - Hewlett-Packard
   - Microsoft

8. Who left his job as president of Pepsi-Cola to become Apple's CEO?
   - Gilbert Amelio
   - John Sculley
   - Jim Barksdale
   - Jim Clark
   - Andrew Grove

A cool trick from Sandy
by Sandy Santiago

Let's say you have a file and it's unknown what it was created in. Open the Text Edit program and "try" to open the file. You will get a string of data telling what, where, when and who created it. That will put you closer to knowing what to use to attempt to open it! *MU*
